**FALL QUARTER 2009  
9/24/09-12/4/09**

**HISTORY OF HEALTH SCIENCES COURSES**

---

**HHS200A: INTRODUCTION TO THE HISTORY OF HEALTH SCIENCES**

**Tuesdays 10:00-12:00**

**Laurel Heights Room 485**

**D. Porter  
4 Units**

---

General survey chronologically arranged from ancient times to 1800, with the primary focus on the Western world. This course presents the broad conceptual developments that in each period influenced the evolution of medical knowledge, the promotion of professional activities, and the experiences of illness and health. (department: HISTSOCMED ) Restrictions: None. Lecture 2 hours. Project 3 hours. Independent study 3 hours.

---

**HHS201A: DISEASE AND THE SOCIAL ORDER FROM THE BLACK DEATH TO SARS**

**Wednesdays 10:00-12:00**

**Laurel Heights Room 485**

**B Dolan  
4 Units**

---

The course explores the comparative impact of disease upon European and North American societies. It will concentrate on the historical junctures at which diseases occurred; unravel the various levels of meaning which surrounded them in terms of their social, moral, and political interpretations; and analyze the patterns of response to them and discuss their historical consequences. ( department: HISTSOCMED ) Restrictions: None. Lecture 2 hours. Project 3 hours. Independent study 3 hours.

---

FALL QUARTER 2009  
9/24/09-12/4/09

MEDICAL ANTHROPOLOGY COURSES

---

<b>ANTH 200: OFF CAMPUS STUDY</b>	<b>Staff</b> <b>0 Units</b>
-----------------------------------	--------------------------------

---

UCSF Students who are taking all their coursework at UCB during a given quarter, should register for Anth 200. This informs the UCSF registrar that you are taking courses but not at UCSF.

---

<b>ANTH 211B: ANTHROPOLOGY: RESEARCH TRAINING SEMINAR I: INTRODUCTION TO ETHNOGRAPHIC RESEARCH.</b>	<b>V. Adams</b>
---	-----------------

---

<b>Wednesdays 9:00-12:00</b>	<b>Laurel Heights – Room 476</b>	<b>4 units</b>
------------------------------	----------------------------------	----------------

---

In-depth introduction to research design and field methods. Problem formulation, research design, and the use of specific methods is highlighted from a variety of perspectives. Emphasis is on identification and development of a research problem, the development of research questions, and the relationship to appropriate methods for fieldwork that takes place in a clinical setting during 211B. Required for and open only to second-year students in the intercampus PhD Program in Medical Anthropology. Lecture 1 hours. Seminar 1 hours. Field Work 12-18 hours.

Fundamentals of anthropological research design, methods, and analysis through lectures, readings and field assignments. ( department: HISTSOCMED )

---
